

Air 1 radio and Klove are a very much needed and type of radio stations that provide positive and encouraging music for the community, instead of music which depicts suicide, anarchy and degradation of society the norm, Air 1 and Klove provide a positive note which gives hope, encouragement and a sense of belonging and not isolation. If these stations are no longer available just as prayer in school has escalated the violence and diminishing morale of students so will our communities experience in great escalation these attitudes and behaviours.
